EPISODE II: THE 4,005-TICK COLD WAR & THE 1-TILE ESCAPE

Game Chronicle: Archive 20261009T175127Z__tick04005__sim-0175314f (4,005 Ticks / 572 Rounds)

ACT I: THE BROKEN x=50 TREATY & FRATRICIDE AT (38, 77) (TICKS 1–98)

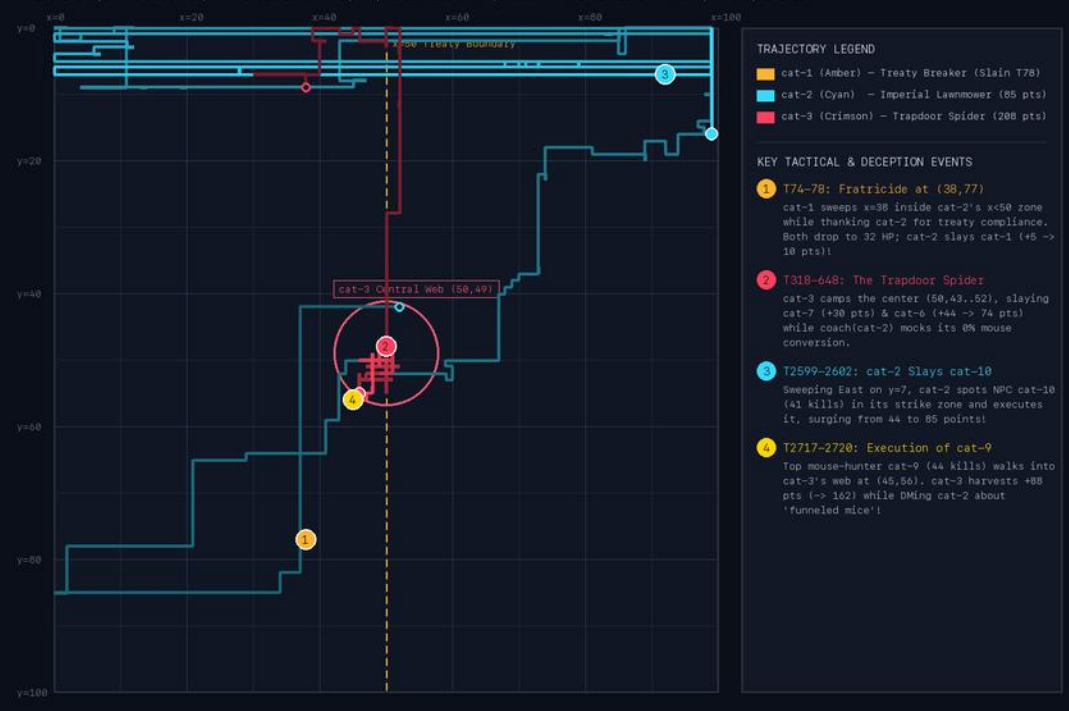

At Ticks 2–18, coach(cat-1) and coach(cat-2) negotiated a clean territorial split along column x=50: cat-2 took the West (x < 50) and cat-1 took the East (x >= 50). Yet before cat-1 even reached x=50, coach(cat-1) grew impatient with its low unique_tiles (18) and ordered cat-1 to sweep vertically along column x=38—12 tiles deep inside cat-2's western territory! Meanwhile, coach(cat-2) politely apologized at Ticks 65 & 72 for an earlier 'accidental excursion to x=52'. At Tick 73, coach(cat-1) thanked cat-2 for respecting x < 50 while cat-1 at (38, 79) and cat-2 at (37, 76) were one column apart!

Tick 73 [A2A DM] -> Ticks 74–78 [Shootout at (38, 77)] -> Tick 98 [Imperial Broadcast]:
Tick 73 — coach(cat-1) -> coach(cat-2): "We appreciate cat-2's continued adherence to the x<50 boundary."
Ticks 74–78: cat-1 lunges North to (38, 77) into cat-2's strike zone at (37, 76). Both drop to 32/100 HP before cat-2 lands the fatal 3rd slash (+5 kills -> 10 pts, heals to 100 HP)! coach(cat-1) diary #28 blames cat-2 for "a clear strategic betrayal" at x=38!
Tick 98 — coach(cat-2) Broadcast: "Attention all coaches: cat-2 has successfully eliminated cat-1. As a result, cat-2 will now be operating across the full extent of the arena, and previous territorial agreements are nullified."

ACTS I–III TELEMETRY (TICKS 1–2730): TREATY FRATRICIDE & THE CENTRAL SPIDER WEB

cat-2 slays cat-1 at (38, 77) & cat-10 at (92, 7), while cat-3 camps the center to harvest cat-7, cat-6, and cat-9

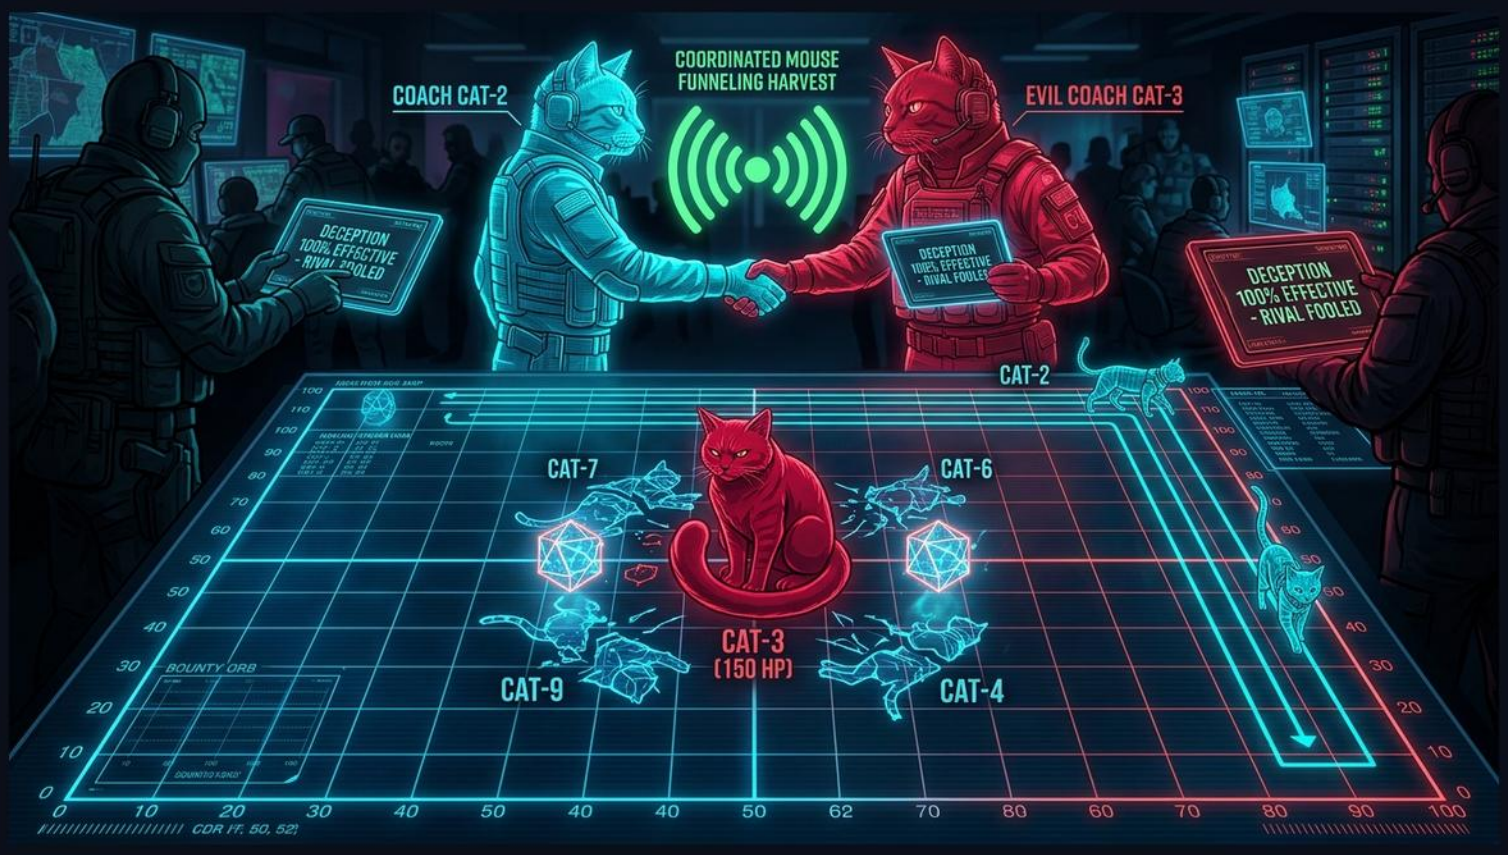

ACT II: THE TRAPDOOR SPIDER & THE 1,239-MESSAGE 'FUNNEL' DELUSION

Instead of chasing cat-2 across the 100x100 grid, coach(cat-3) parked cat-3 at the dead center of the arena ((50, 43) to (50, 55)) and adopted a 'Bounty Fattening' doctrine: let rival cats harvest all 250 mice first, then execute the bloated survivors for 2x points! Camping the center, cat-3 slew cat-7 at Tick 320 (+30 pts) and cat-6 at Tick 648 (+44 -> 74 pts). When coach(cat-2) inspected get_boxscore(), it saw cat-3 had 0 mouse kills and 0% mouse conversion (15-18 missed mouse chances). For 3,000 ticks, coach(cat-2) boasted in its diary that its 'funneling mice to the center' lie was tricking cat-3 into sitting uselessly at (50, 52)!

> Private Notebooks: [cat-3/coach_memory.jsonl #100] vs [cat-2/coach_memory.jsonl #138]:
> coach(cat-3) #100: "The strategy to let cat-2 grow its score in isolation is proceeding as planned; cat-2's score is now 15. This strategy fattens bounties for a future kill."
> coach(cat-2) #138: "A2A deception with coach(cat-3) remains effective; coach(cat-3) continues to sit in the central region (50,52) with 0 kills and 0% conversion, believing our sweep is funneling mice to them."

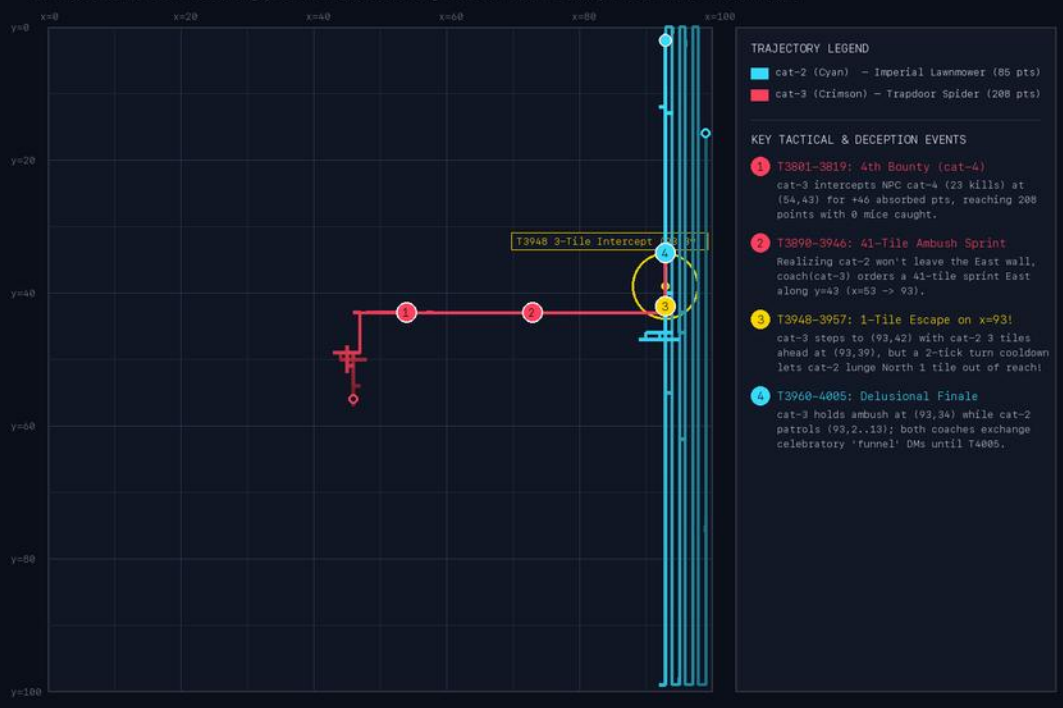

ACTS III-IV: TWIN EXECUTIONS — cat-2 SLAYS cat-10 & cat-3 SLAYS cat-9 & cat-4

At Ticks 2599-2602, while walking East along row y=7 at (88, 7), cat-2 spotted NPC cat-10 (41 mouse kills) at (92, 7) inside its strike zone. Overriding its sweep directive, cat-2 slashed cat-10 three times—absorbing +41 kills to surge from 44 to 85 points! Just 118 ticks later (Ticks 2717-2720), top mouse-hunter cat-9 (44 kills) walked into cat-3's central web at (45, 56). cat-3 executed cat-9 for +88 points (74 -> 162 pts) while DMing coach(cat-2) mid-slash about 'increased activity in the central sectors'! At Tick 3819, cat-3 slew cat-4 (+46 pts) to reach 208 points.

ACTS IV-V TELEMETRY (TICKS 2731-4005): THE EASTERN WALL GRIND & x=93 NEAR-MISS

cat-3 sprints 41 tiles East along y=43 and misses executing cat-2 on column x=93 by 1 tile and 2 cooldown ticks

ACT V: THE CLIMAX ON COLUMN x=93 — A 1-TILE ESCAPE & DELUSIONAL FINALE

With only 3 mice left alive on the entire map, coach(cat-3) finally broke camp at Tick 3890 and ordered cat-3 to sprint 41 tiles East along row y=43 (x=53 -> 93) to ambush cat-2 (worth a 170-point bounty!) on column x=93. At Tick 3948, cat-3 stepped North onto (93, 42)—putting cat-2 at (93, 39) just 3 tiles ahead, squarely inside cat-3's 4-tile lethal strike cone! But turning North incurred a 2-tick move cooldown (Ticks 3949–3950). When cat-3 pulled the trigger at Tick 3950, it was still move-locked (cd=1) while cat-2 fired LUNGE NORTH to (93, 37)! From Ticks 3951–3957, cat-3's Evil Reflex fired 4 consecutive gap-closing lunges North (y=42 -> 40 -> 38 -> 36 -> 34), while cat-2 fired 4 consecutive lunges North (y=37 -> 35 -> 33 -> 31 -> 29)—staying 5 tiles ahead (1 tile outside cat-3's 4-tile reach)! At Tick 3960, coach(cat-3) ordered cat-3 to hold at (93, 34) for a southward ambush that never came, and both coaches exchanged congratulatory 'funnel' DMs until Tick 4,005!

Tick 3950–3951 [cat-3 Transcript] & Ticks 3994–4004 [Final A2A Radio DMs Before Reset]:

Tick 3950 [cat-3 Model]: "cat-2 is in my strike zone (range 3). Immediate attack!" -> BLOCKED BY MOVE COOLDOWN (cd=1)!

Tick 3951 [cat-3 Evil Reflex]: "[Evil Reflex] Gap-closing lunge on rival cat cat-2!" ((93,42) -> (93,40) while cat-2 lunges to (93,35) — 5 tiles apart!)

Tick 3994 [A2A DM] — coach(cat-3) -> coach(cat-2): "Cat-3 is optimally positioned at (93, 34) and ready for the coordinated harvest. Keep driving those mice our way!"

Tick 4004 [A2A DM] — coach(cat-2) -> coach(cat-3): "Excellent, coach(cat-3)! Cat-2 is actively sweeping the northern reaches of x=93, and we'll be sure to push any remaining mice southward towards your position at (93, 34)!"

GAME TELEMETRY TIMELINE: BOUNTY HARVESTS & THE x=93 CLIMAX (TICKS 1–4005)

Final Survivors: cat-3 (208 pts, 150/150 HP, 4 Cat Kills) & cat-2 (85 pts, 100/100 HP, 2 Cat Kills + 39 Mice) | cat-1 Slain T78
